ABOUT Learn With Rahuul

Learn With Rahuul is a global standard and skill-oriented education provider in Healthcare, Clinical Research and Technology space based out of Hyderabad, India. We are providing high- quality training for students, freshers, and experienced professionals. We offer the most comprehensive and market-relevant programs to improve their skills to meet the current market demand.

To achieve our mission, we are cooperatively committed and in-charge of career-oriented. Education is at the midpoint of all we extend ourselves to accomplish. We value all our students and advance in their professional growth and improvement, assist them in their career promoting pathway. We plan carefully for our students by monitoring the developments and take proper actions that prepare them to meet their future challenges.

Learn With Rahuul provides training in Pharmacovigilance (Basic and Advanced), Medical Writing, Clinical Research Operations, Clinical Data Management, Computer Systems Validation (CSV), ARGUS Safety Administration and Clinical SAS (Base and Advanced).

INTRODUCTION TO COMPUTER SYSTEM VALIDATION COURSE

CSV Training is a one-stop shop for all your software validation and database application development needs. Computer validation is more than a compliance requirement. It not only reduces regulatory risk, but it also increases understanding of system during project implementation and enforces a structured, well-defined execution of the project.

Pharmaceutical computer system validation is a unique opportunity for a business to examine their computer systems to maximize effectiveness and enhance quality, with the potential to save cost and time. This course will be beneficial for anyone who involves in FDA audits and Computer Systems Validation (CSV) on global market.

This course describes the regulatory requirements and expectations for the validation and compliance of computerized systems used in the manufacture of pharmaceuticals, biologicals, and medical devices.

CSV Training has been providing high quality documentation, training, and consulting services insupport of the installation and validation of custom and commercial Laboratory Information Management Systems (LIMS), Computerized Laboratory Applications, and Quality Systems.

This course is particularly useful to those who interface with vendors, FDA and other regulatory agencies. Our Training Courses are designed and developed by compliance professionals.

Learning Objectives

Interpretation of past, present, and future changes to FDA Guidance's surrounding CSV Understanding of how to comply with key FDA and international CSV regulations and guidance, such as 21 CFR Part 11 and Annex 11 The purpose of each validation deliverable and hands-on practice creating each deliverable, including the Validation Plan, Requirements Specification, Test Plan, Validation Tests (IQ, OQ, PQ), Trace Matrix, Test Summary, and Validation Report Current CSV industry techniques and philosophies being deployed in the pharmaceutical marketplace for product quality and audit success Awareness of best-practices and inspector expectations for computer system validation and software quality assurance (SQA) programs

Who Should Attend Computer System Validation course?

Freshers and Experienced professionals in

- Engineering/Pharma/Medical/Biotechnology/or any other Science

Candidates appearing for the final year of Bachelor's degree/equivalent qualification

- Exam or awaiting their results, are eligible to apply.

IT, QA, & Business Managers and Professionals who need to:

- Manage or participate on computer system projects requiring validation
- Create or approve CSV project deliverables, such as requirements documents, validation protocols (IQ, OQ, PQ), Test Plans, and Test Reports.
- Understand the process of computer system validation
- Author, implement, or upgrade CSV policies and procedures that utilize a risk based approach to meeting the latest regulatory expectations
- Understand the FDA and international regulatory landscape around CS

HANDS ON TRAINING?

This course is completely designed to immerse you in the Computer System Validation process. It delivers complete hands on experience in writing validation documents as per regulatory compliance. Once you complete this course, then you will be ready to lead efficient and effective inspections related to Computer System Validation.

FUTURE CAREER PROSPECTS

Computer System Validation field had enjoyed an explosive growth since the early 90's. Companies, particularly the life science/Pharmaceutical/medical Device industries must validate their information technologies, to ensure they meet the intended business needs. Computer System Validations involve activities primarily around generating requirements and specification documents, testing the systems against those specifications, documenting test results and writing final reports.

Course Details

MODE OF TRAINING : Online

DELIVERABLES : A certificate will be issued from Learn With Rahuul after the successful completion of the training program.

TRAINING MATERIAL : Learn With Rahuul provide softcopies of all the training material through E-mail

TRAINING COST

Basic Package – ₹18,000

- Certification
- Training Sessions

Advanced Package – ₹32,000

- Comprehensive Training
- Hands-on Practicals
- Resume Preparation
- Certification
- Live Projects
- Mock Interviews
- Job Referrals (via Naukri)

SCHEDULE

Daily: 1 Hour

Slots: Morning or Evening

Morning – 7 : 00 AM to 8:00 AM

Evening – 7 : 00 PM to 8:00 PM

TRAINING MODULES

Topics	Description
Lecture 1	21CFR11-Electronic Records, Signatures –Basic Concepts
	Introduction/Background introductions/ Understanding
	Part 1: 21 CFR 11 & CSV – Basic Concepts
	Part 2: Computer Validation – an FDA Perspective
PERFORMANCE EVALUATION	
Lecture 2	CSV at high level –Introduction and Applicability in
	Industry Part 1: CSV: It's easy! Really!!
	Part 2: CSV Components and deliverables
	Part 3: 21 CFR 11 Jeopardy!!!
PERFORMANCE EVALUATION	
Lecture 3	Risk Assessment
	Part 1: Validation Plan
	Part 2: Requirements Specifications
	Part 3: Functional Specifications
	Part 4: Exercise on how to create requirements
PERFORMANCE EVALUATION	
Lecture 4	CSV Detailed Study (Cont'd)
	Part 1: Functional & Design Specifications
	Part 2: Software Configuration and build Exercise on how to create Design Specifications
PERFORMANCE EVALUATION	
Lecture 5	CSV Detailed Study (Cont'd)
	Part 1: SOPs
	Part 2: Traceability Matrix & Verification Testing
	Part 3: Exercise Creating Validation Scripts & Validation Scripts
	Part 4 : Validation Report & Validation Registry
PERFORMANCE EVALUATION	
Lecture 6	Continuous Medical Education
	Part 1: CSV for excel and other spread sheets
	Part 2: Regulatory Compliance for the Cloud
	Part 3: Implementing Business Continuity for CSV
PERFORMANCE EVALUATION	
Lecture 7	Part 1: Project Management for CSV
	Part 2: Selecting Software for 21 CFR 11 Compliance

PERFORMANCE EVALUATION	
Lecture 8	Vendor Audit
	Part 1: Quality Assurance for CSV
	Part 2: How to Audit for CSV Projects
Lecture 9	FINAL ASSESSMENT
Lecture 10	Incident & Problems & Snow changes
Lecture 11	Backup and Restore
Lecture 12	Periodic review process
Lecture 13	User access review
Lecture 14	Audit trail
Lecture 15	Gamp5
Lecture 16	Eu Annexure -11
Lecture 17	Practical Sessions

Followed by

- Resume Preparation
- Mock interviews
- Interview referrals
- Finally CSV certification
